PROFILE

4th-year Cybersecurity Engineering student (SSIR) at TEK-UP University, building on a Bachelor's degree in Embedded Systems. I haven't locked myself into a single security specialty — instead I've gained hands-on experience across **SOC / blue-team operations, penetration testing, network security, malware analysis and secure development**. Seeking a **Summer 2026 internship** in cybersecurity where I can contribute, learn fast, and discover where I add the most value. I learn quickly, enjoy real-world challenges, and combine a low-level hardware mindset with a security-first approach.

SECURITY PROJECTS

API Penetration Test & Automation Dashboard

2026

Offensive Security · OWASP API Top 10

- Audited the VAMPI API: **6 vulnerabilities (4 critical)** across 4 OWASP API categories.
- Cracked the HS256 JWT secret with hashcat and chained BOLA + Mass Assignment to full admin takeover.
- Built a **FastAPI + React + PostgreSQL** dashboard that reproduces the whole audit automatically and exports a report.

Kali Linux · Burp Suite · hashcat · FastAPI · React · PostgreSQL · Docker

Distributed SOC with AI-Powered Triage

2026

Blue Team · SIEM / SOAR

- Built an end-to-end open-source SOC: **Wazuh** (SIEM/HIDS) + **TheHive** + **Cortex** + **Shuffle** SOAR.
- Integrated a local **Llama 3** model (Ollama) for AI alert triage; mapped detections to MITRE ATT&CK.
- ZeroTier mesh across 2 hosts, 4 monitored Linux agents, full attack→detection→response validated.

Wazuh · TheHive · Cortex · Shuffle · Ollama/Llama 3 · ZeroTier · EVE-NG

IP/MPLS Backbone with Firewall & DMZ

2025–26

Network Security · Cisco ASA

- Hardened an enterprise IP/MPLS backbone with redundant **Cisco ASA** firewalls (HA failover).
- Segmented **DMZ** (SMTP/WWW/DNS), OSPF routing, RADIUS AAA, IPS threat-detection, Zabbix monitoring.

Cisco ASA · OSPF · MPLS · RADIUS · Zabbix · EVE-NG · GNS3

SafeClub — Blockchain DAO Treasury

2025–26

Web3 Security · Solidity Smart Contract

- Secure on-chain treasury with proposal → vote → execute governance (quorum + majority).
- Hardened with OpenZeppelin **Ownable** + **ReentrancyGuard**; React + ethers.js dashboard.

Solidity · Hardhat · OpenZeppelin · ethers.js · React

Emotet Malware — Complete Analysis

2026

Malware Analysis · Threat Intel

- Analysed the full Emotet kill chain (static & dynamic); extracted IOCs and mapped TTPs to MITRE ATT&CK.

FULL-STACK & ENGINEERING PROJECTS

Smart Surveillance Platform

2025–26

Computer Vision · Full-Stack

Real-time face detection (MTCNN) + recognition (FaceNet/SVM) with tamper-evident SHA-256 watermarking. FastAPI + React + PostgreSQL, JWT, WebSockets, Docker.

Beauty Center Desktop App · Jobs & Internships Platform

2025–26

Cross-platform desktop suite (Tauri 2 + Rust + React 19) and a Symfony 7 recruitment portal (Doctrine, MySQL, RBAC).

Embedded & IoT

2023–25

IoT visitor-security system (Raspberry Pi), Arduino line-follower robot (ENIT competition), ultrasonic radar, parking-management app (C/GLADE).

EDUCATION

Cybersecurity & Network Engineering (SSIR)

TEK-UP University — Tunisia

4th year · 2025–2026 · expected 2027

Bachelor's Degree (Licence) — Embedded Systems

Tunisia

Graduated 2023

EXPERIENCE

Electronics Design Intern

COFAT — Tunis, Tunisia

Feb – Jun 2023

- Designed an automotive cable tester for COFAT clients (Volkswagen, SEAT) and an electronic box-support tester.

Summer Intern

TBC Technopole

- Solar-panel tracking system — embedded electronics & automation.

TECHNICAL SKILLS

SECURITY

Penetration testing (OWASP API Top 10), SOC operations, SIEM/SOAR, malware analysis (MITRE ATT&CK, IOCs), smart-contract security

SECURITY TOOLS

Wazuh · TheHive · Cortex · Shuffle · Burp Suite · Nmap · Wireshark · hashcat · Kali Linux

NETWORKING

Cisco (ASA, OSPF, MPLS, AAA/RADIUS) · GNS3 · EVE-NG · DMZ/Firewalls · Zabbix

PROGRAMMING

Python · C · C++ · Java · JavaScript/TypeScript · Solidity · PHP

WEB / FULL-STACK

React · Next.js · Node.js · FastAPI · Spring Boot · Symfony · PostgreSQL/MySQL

SYSTEMS & CLOUD

Linux (Ubuntu/Kali) · Docker · Git · AWS

EMBEDDED / IOT

Arduino · ESP32 · Raspberry Pi · STM32

LANGUAGES

Arabic — Native

French — Fluent

English — Professional working

INTERESTS

CTF challenges · Home lab / SOC building · Blockchain security · Electronics & IoT tinkering
